

# Thinking Tool

## LEARNING JIGSAW

When a topic is introduced, break it up into five areas to explore.

Break up the class into five groups and allocate an area to investigate.

Your group can explore the area of the topic using any thinking strategy or tool they wish to.

Each group explores their area and shares their presentation with the class.

Everyone enters the findings in the **Area of Topic** sections.

As a class, combine the efforts of the five groups to come up with an overall view point of the topic.

### AREA OF TOPIC 1

What was discovered?

### AREA OF TOPIC 2

What was discovered?

### AREA OF TOPIC 3

What was discovered?

### AREA OF TOPIC 4

What was discovered?

### AREA OF TOPIC 5

What was discovered?

### CLASS TOPIC

Overall, what did we learn?
