

## Q4 Email Updates to Parents

### 100% Complete for the Week

Dear Chemistry Families,

I am happy to inform you that your student has completed 100% of the **Q4 Learning Experience 2: States of Matter** lesson that was scheduled for May 13 through May 19. I appreciate your student's dedication to the course and finishing out the year. I will send a separate email informing you of their continued progress for future lessons.

As always, thanks for your support.

### 0% Complete for the Week

Dear Chemistry Families,

I regret to inform you that your student has not started the **Q4 Learning Experience 2: States of Matter** lesson that was posted to Schoology for the week of May 13 through May 19. (This means they have completed 0% of the materials that were posted for this week.) This is a mandatory Q4 Lesson as stated by HCPS, as shown below:

\*\*\*\*\*

### DRHS Students in Grades 9 - 11

All other students (middle and high school) currently enrolled in a high-school credit-bearing course will engage in required\* new learning experiences that will include essential missing content that would have been taught after March 13, 2020. This content will not be graded, however, there will be a denotation on the transcript that will be removed upon completion of the missing content/new learning modules.

\*Students who are unable to complete the modules during this window will have another opportunity in the 2020-21 school year. Students enrolled in a course with an associated verified credit (e.g., related SOL) who need the associated verified credit to meet graduation requirements **and** have received the standard credit will be awarded a Locally Awarded Verified Credit (LAVC).

\*\*\*\*\*

Here is a short 3 min video to show them how to get started on Week 1 assignments:

<https://www.loom.com/share/6fc9d5858f024617811697f8dc4d8d38>. I made a similar video for Week 2 but it's located in the **Q4 Learning Experience 2: States of Matter** folder.

I will send a separate email next week to update you on their progress so that you will know if they finished Week 2 or not. All Week 2 materials will be enabled until June 9, but the sooner they complete the work the better. Week 3 starts tomorrow, and the **Q4 Learning Experience 3: Solutions** folder opens tonight at midnight.

I will send a separate email informing you of their continued progress for future lessons. Please let me know if you have any questions.

As always, thanks for your support.

#### **Less than 50% Complete for the Week**

Dear Chemistry Families,

I wanted to make you aware that while your student has started the **Q4 Learning Experience 2: States of Matter** lesson that was posted to Schoology for the week of May 13 through May 19, they have made *very little* progress. (This means they have completed less than 50% of the materials that were posted for this week.) This is a mandatory Q4 Lesson as stated by HCPS, as shown below:

\*\*\*\*\*

#### **DRHS Students in Grades 9 - 11**

All other students (middle and high school) currently enrolled in a high-school credit-bearing course will engage in required\* new learning experiences that will include essential missing content that would have been taught after March 13, 2020. This content will not be graded, however, there will be a denotation on the transcript that will be removed upon completion of the missing content/new learning modules.

Here is a short 2 min video explaining where to find my step-by-step video for completing Week 1 material: <https://www.loom.com/share/816ca2494c2e462f94bf23915713ff7e> In this video, I literally go through all the notes, checks for understand, labs, and cumulative assessment with the students verbatim as posted. Week 2 is the same just in the next folder.

I will send a separate email next week to update you on their progress so that you will know if they finished Week 2 or not. All Week 2 materials will be enabled until June 9, but the sooner they complete the work the better.

Please let me know if you have any questions. As always, thanks for your support.

#### **Between 50 – 99% Complete for the Week**

Dear Chemistry Families,

I wanted to make you aware that your student started the **Q4 Learning Experience 2: States of Matter** lesson that was posted to Schoology for this week of May 13 through May 19, but they are not finished yet. Since today is the 19<sup>th</sup>, which is the posted due date for this assignment, I will send you an email after dinner to inform you if they complete it on time. If you do not receive a second email, that means that your student is falling behind schedule. All materials will be enabled until June 9. Weekly deadlines are only posted to help students pace themselves so they do not feel overwhelmed all at once at the end of Q4.

This is a mandatory Q4 Lesson as stated by HCPS, as shown below:
