

Choose a recent article (within the past 5 years) that explains how chemistry has influenced technology, agriculture, the environment, medicine, or some other aspect of everyday life. Using the space below, gather information to write a summary of the article. Students present in class should use the magazines and newspapers provided by the teacher. Students, who are absent, may use the links below:

- <https://www.scientificamerican.com>
- <https://cen.acs.org/index.html>

Information to use in summary

Author(s) name(s) - _____

Date of article - _____

Publisher/Website - _____

Title of article - _____

Three interesting facts

1. _____

2. _____

3. _____

Now combine the credentials with the facts to make a short summary paragraph on the back of this page. (If you type it, you must print and attach for editing.)
